# About Oasis

## Creating an environment designed to work for you.

The way we work, meet and study has changed. Tranquillity is hard to find in open spaces but our Oasis range offers a haven of calm.

The Oasis Collection is split into three categories – **Oasis Linear**, **Oasis Soft** and **Oasis Architecture** and includes pods, booths, hubs and seating.

It has been designed to compliment your space, and add value to your environment.

### Oasis Linear

Oasis Linear is designed with straight, bold edges and crafted with acoustically absorbent fabric interior panels. With hydraulically closing doors that quietly seal behind you, the range provides the ultimate in concentration and acoustic comfort. External options in veneer, laminate and bespoke graphics enable your space to be personalized to reflect your environment. From individual 1-person pods to larger multi-user team pods and booths, the Oasis Linear range meets all requirements and all are available with media and technology integration.

### Oasis Soft

Oasis Soft is an upholstered product range designed to give a softer, homely feel which provides smart, flexible and adaptable spaces for your every need. The range has been created with soft lines and curves and crafted with acoustically absorbent panels. It is an ideal environment – versatile for individual and collaborative work as well as informal or formal meetings. Pods, booths and hubs all provide flexible, comfortable and private environments in which to work or study individually or as a group. All are available with media and technology integration.

### Oasis Architecture

Oasis Architecture is a system that links Soft booths and pods into a clever combined environment. Utilising Canopy, Bridge and Orbit a multi-functional space can be created for your space. Canopy is a louvre cantilever ceiling which suspends from the side or rear of a pod or booth. Bridge is an acoustic louvre ceiling that links two structures creating a third usable space. Orbit creates space wherever you want, as it can 'orbit' a full 360-degrees around a pod or booth.

# Manufactured in the UK

Our Oasis Collection is manufactured in our Haverhill production site using state of the art machinery, and good old-fashioned craftsmanship and expertise. We complete every part of the manufacturing process: from the raw material selection, to processing and through to finishing. Nothing is subcontracted, and everything is under our control. This means we can be sure that the quality of our products meets our exacting standards, both structurally and aesthetically.

We strive to ensure our materials and processes are kind to the environment and sustainable for the future. Our green credentials play a huge part in reducing our carbon footprint. We do our bit by recycling our waste steel to burning our waste wood to heat our certified carbon neutral biomass boiler.

# Fit your Space

Our talented team of experienced designers will transform your vision into a design that ticks all the boxes both practically and aesthetically.

If you can't find what you're looking for, or have awkward spaces to fill, our free bespoke design service is your solution. It makes planning and installing your ideal solution simple and stress-free.

- An experienced consultant will visit you to discuss your requirements first-hand. They will also conduct a site survey of the area involved.
- Our consultant will liaise with our team of dedicated designers, to ensure that your brief is translated accurately.
- Our consultant will present our concept for your approval, and take on board any amendments, suggestions or tweaks.
- Our designers can produce 3D photo-real imagery of your concept, to help you visualise the finished product. We can also provide sample swatches if required.
- Our team of skilled engineers will transform your concept into reality. They use the latest technology, alongside traditional skills, to make sure the highest levels of craftsmanship are maintained.
- Finally, our experienced installation teams will install your finished product, ensuring that the whole process is as seamless as it can possibly be.

# Public Libraries

As libraries develop to meet the needs of the community and the environments they provide for people evolve, we understand how precious public space is.

The Oasis Collection provides many solutions for a forward thinking, sustainable public library, with well-being and innovation in mind.

Featured here for example is our Oasis Soft Team Pod. It has elements that create a more peaceful, comfortable and private experience especially if the library is busy with the hub-bub of daily life.

Also featured here is our Oasis Soft Team Hub. The Hub range comprises of low-level open seating spaces available as individual units or clusters, providing multiple occupancy areas in minimal space.

# Public Libraries

Our Oasis Soft Social Booth shown here is a versatile, open-fronted booth available in three distinctive shaped ceiling options; straight, radius or pitch.

This semi-private space is ideal for reading, study or meeting. Pendant or LED ceiling lighting plus free standing or fixed table comes as standard. All upholstery can be personalized to suit your setting and budget and optional power supply is also available.

We provide detailed 3D design layouts

Oasis Soft Team Pod – for a peaceful, quiet and private environment to work or meet.

Oasis Soft Hub Clusters - can be configured as you require. Ideal for individual study spaces.

Calderdale Royal Infirmary

# Health Libraries

Any successful health library needs to provide a varied environment which includes relaxed study furniture, group study areas, formal study desks and quiet, private space to support NHS healthcare staff and students alike.

The Oasis Collection provides multiple options in meeting these library requirements.

# Health Libraries

Oasis Linear Duo Pod – Fully enclosed with a full ceiling and a glazed rear wall, incorporating acoustically absorbent materials, LED ceiling lights, air circulation and passive infra-red sensor, these pods stay light and fresh when in use.

# Education

Collaborative and individual work and study, without distractions, is demanded by the modern-day learning environment.

A room for your every need, the Oasis Linear Team Booth is completely versatile. It provides the perfect space for small group work, presentations, video conferencing or an informal breakout area.

The booth can even be a welcoming space for personal reflection such as meditation or yoga.

With space for four or more people, the open fronted booth is enclosed with a full ceiling for privacy and the option to include glazed panels, fitted workspaces, low back sofas or even coat hooks for that homely feel.

# Oasis Architecture

Oasis Architecture enables you to make use of unused space between and around your existing or new Oasis Soft pods and booths. Stylish bridges link two freestanding pods or booths together to create a unique area where people can study, work and meet.

Bridge is a louvre ceiling, cleverly linking two structures, by creating a third usable space.

Having the acoustic ceiling with the two fabric external sides, this space is not only comfortable and inviting but acoustically cosseted.

Canopy is a louvre cantilever ceiling which suspends from the side or rear of the pod or booth. Utilising the outside space by creating an open environment for additional seating. (shown right).

## Orbit with Soft Team Booth

Orbit creates space wherever you want, as it can 'orbit' a full 360-degree around the pod or booth. Similar to the canopy, the Orbit utilises outside space, and as it is mobile, areas can be created AS they are needed, WHERE they are needed.
